Milk / Steam Systems

BASIC
MILK

Basic Milk

Hot milk, hot milk foam –
fully automated using the drink spout.

EASY
MILK

Easy Milk

Hot and cold milk, hot milk foam –
fully automated using the drink spout.

DYNAMIC
MILK

Dynamic Milk

Hot and cold milk, hot and cold milk foam –
fully automated using the drink spout.
As well different kinds of hot and cold milk foam textures.

BASIC
STEAM

Basic Steam

Hot drinks, hot milk and hot milk foam – using
the steam wand. Manual switching on and off.

EASY
STEAM

Easy Steam

Hot drinks, hot milk and hot milk foam – using the steam wand.
Automated switching off using the temperature sensor.

AUTO
STEAM

Auto Steam

Hot drinks, hot milk and hot milk foam in three quality
grades – using the steam wand. Fully automated, switching off
using the integrated temperature sensor.

Cleaning Systems

BASIC
CLEAN

Basic Clean

With this manual system, the coffee machine is cleaned using a cleaning
solution and water, before being rinsed with fresh water. The spout needs
to be manually cleaned each day by placing it in a special cleaning fluid.
For machines with Basic Milk or machines without milk systems.

EASY
CLEAN

Easy Clean

This fully automatic system for the Easy Milk system uses a special cleaning
container and soluble cleaning tablets. After having connected the milk
hose to the cleaning container, the machine dispenses water into the con-
tainer, then cleans and rinses the machine automatically with the cleaning
solution and steam. The milk foamer is cleaned manually once a week.

PLUG
+CLEAN

Plug+Clean

This patented system uses hot water and steam to clean the milk system by
simply plugging the Plug+Clean adapter into the Plug+Clean socket of the
machine/cooler. This eliminates the need to dismantle the milk foamer each
day, reducing manual cleaning in the cleaning fluid to just once a week.

Click+Clean for WMF 1100 S

The same cleaning system, the only difference is that the adapter has to be
attached to the machine's hot water spout.

CLEAN
IN PLACE

Clean in Place

Our most advanced cleaning system operates in the same way as the Easy
Clean system, but with the additional advantage that the milk foamer is
also cleaned automatically by the system. It's the ultimate in user-friendly
efficiency for all machines with Dynamic Milk system.

All cleaning systems are according to the model and configuration of the
WMF coffee machine.

Fresh Filtered Coffee

THE FINEST FILTERED COFFEE,
FRESHLY BREWED CUP BY CUP.

With WMF's innovative Fresh Filtered Coffee option, for the first time you can serve fine coffee specialities and delicious fresh filtered coffee from a single machine!

Thanks to our new filter capsule system, each cup is freshly brewed from aromatic coffee beans and then smoothly filtered to remove sediments and oils. Because the system ensures a constant temperature and volume, every cup of filtered coffee is as wonderfully flavourful and fresh as the last.

AVAILABLE FOR
WMF 5000 S+ AND WMF 1500 S+

YOUR BENEFITS OF FRESH FILTERED COFFEE:

- Coffee specialities and fresh filtered coffee from a single machine
- Always fresh filtered coffee of the highest quality, thanks to the constant temperature, volume and flavour
- Freshly brewed cup by cup
- Always the best coffee specialities, thanks to the various WMF milk systems
- Filter capsule for up to 100 cups or 3 days
- Minimal footprint for maximum variety
- Savings on your investment, energy and maintenance costs

Chilled Coffee

THE IDEAL CHILLED COFFEE SOLUTION,
RAPIDLY SERVED FOR GREATER CHOICE.

Offer your customers a wide new range of speciality recipes with or without milk or syrups, thanks to the ingenious Chilled Coffee system available with the WMF 5000 S+.

It works by freshly brewing an individual cup of hot coffee then rapidly cooling it, providing a quick and smart way to prepare delicious iced coffee and other distinctive drinks. The result?

Not only does this save energy, it also means your chilled coffee beverages look and taste superb, with more ice or ice cream remaining intact.

WMF CoffeeConnect

COFFEE EXCELLENCE MEETS DIGITAL SOLUTIONS.

If you run a coffee business, you have probably wondered how you could improve its efficiency and profitability. But it may seem like a lot of effort. Perhaps you do not have the time to do the necessary analysis, or even access to the numbers you need.

With WMF CoffeeConnect, gathering data, understanding it and using it becomes almost effortless. Join our digital world and discover how WMF CoffeeConnect can help you optimise your business.

ALL THE ADVANTAGES OF CONNECTED KNOWLEDGE MAIN BENEFITS

- Visualization**
 - Business Performance Data
 - Maintenance and Operation Data
- Machine Management**
 - Centralised machine and user management
 - Bi-directional communication
- Deep Insights**
 - Standard reports
 - Tailor-made analytics
- Data Provisioning**
 - Providing system interfaces (APIs)
 - Customer-specific implementation projects
- Additional Tools**
 - Media Pool

SMALL AND MEDIUM-SIZED BUSINESS

If your business is a hotel, restaurant, bar, coffee shop, office or catering company with a limited number of professional coffee machines, you can use WMF CoffeeConnect to add value by monitoring maintenance, operation, consumption and service data.

LARGE BUSINESS

If yours is a high-revenue organization with numerous coffee machines spread across a wide geographical area, you can take advantage of WMF CoffeeConnect to analyse and optimize your business performance.

OPERATOR

As an operator, you may be interested in functions that indicate the filling levels, consumption and tasks of your customers' professional coffee machines. WMF CoffeeConnect helps you increase uptime, optimize inventory management and trouble-shoot.

Advice concerning mobile coffee stations:

Mobile station prepared for fixation of the coffee machines WMF 1500 S Classic, 1500 S+ und 5000 S+.

In case of use with the coffee machines 1200 F and 9000 S+ during order entry the requested combination incl. arrangement needs to be stated in the production memo!

With the option "Grounds through counter" please consider this as well for the configuration of the coffee machine!

¹ = Please absolutely state exact combination and arrangement (machine and cooler) in production memo of order.

² = During order entry the requested combination incl. arrangement needs to be stated in the production memo! The coffee machine additionally requires the option "Grounds through counter".
